Focus on the big picture

How to align Finance and Controlling with future requirements.

Our business environment is becoming increasingly complex while new technologies continuously capture the market. Against this backdrop, transformation within organizations has become vital to their survival. But what approach is right for your company? Finding your bearings in this field is not an easy task. As there is no one-fits-all template for companies, how do you categorize new methods and identify the benefits of new systems? The right agenda for aligning your Finance and Controlling therefore needs to be developed individually.

Base your agenda on your Finance and Controlling mission. Take stock of your company's situation in relation to your goals and how you want to shape the future to achieve them. Best practice solutions are no help in this case. It is better to develop your transformation on the basis of a sound analysis so that it is tailored to your organization, your corporate culture and your employees.

Our CA Finance & Controlling Operating Model (CA-FICOM) is an effective model that supports you in setting out your specific CFO/Controlling agenda in accordance with your mission. Our approach not only takes into account your current situation and goals, but also, and more importantly, adopts a holistic stance that includes people and necessary skills.

You don't currently have a valid mission? You are not alone, because only some 30% of our business partners have a valid mission, and only half of them have an agenda and a roadmap. All the more reason to get started! Take advantage of our practical know-how. We will be happy to assist you.

Do you want to use our CA Finance & Controlling Operating Model for yourself?

IN THE ORIENTATION WORKSHOP YOU:

- Learn how to deal with the dynamics and complexity of today's world and how to select the right tools for the job
- Get to know our CA-FICOM method for developing a CFO/Controlling agenda
- Will be guided through the 7 fields of action using initial key questions

AFTER THE ORIENTATION WORKSHOP YOU:

- Know the relevant fields of action for your company
- Gained valuable insights into how you can drive the transformation forward with your employees
- Have a checklist for the next steps and can immediately start implementing them yourself
- Know how the CA can effectively support you and your organization

We will be happy to assist:

Jens Ropers, Partner
Mobile: +49 (0)160-93864324
j.ropers@ca-akademie.de

Book an appointment with Jens Ropers now

... to stay future-focused

... to inject fresh ideas into the company

... to ensure the company's sustainable development

... make data-based decisions

... automate processes

... to secure objectives and results

... to be able to rise to challenges

... to be better equipped to tackle complexity

... to work more efficiently and save costs

... to improve employee loyalty

... design change processes

... to be an attractive employer

... to maintain a holistic management model

For our companies

We want ...

Three Steps to Finance Transformation.

You aim to develop your division with an eye to the future? Make a success of this transformation with a CFO/Controlling agenda and the benefit of our expertise. Take your divisions' mission as the basis for your agenda, firm up the details with the operating model and then use the road map to put it into practice. We focus on your existing resources and support you in areas where they are lacking.

1 CFO/Controlling Mission

- What is our future goal?**
 Together with us, you develop your Finance and Controlling mission. We view this process holistically, taking account of your corporate strategy.
- How do we see our future role?**
 You define the future role of Finance and Controlling in the company, the value compass that will guide you, and how the two fit in with your existing corporate culture.

2 Finance & Controlling Operating Model

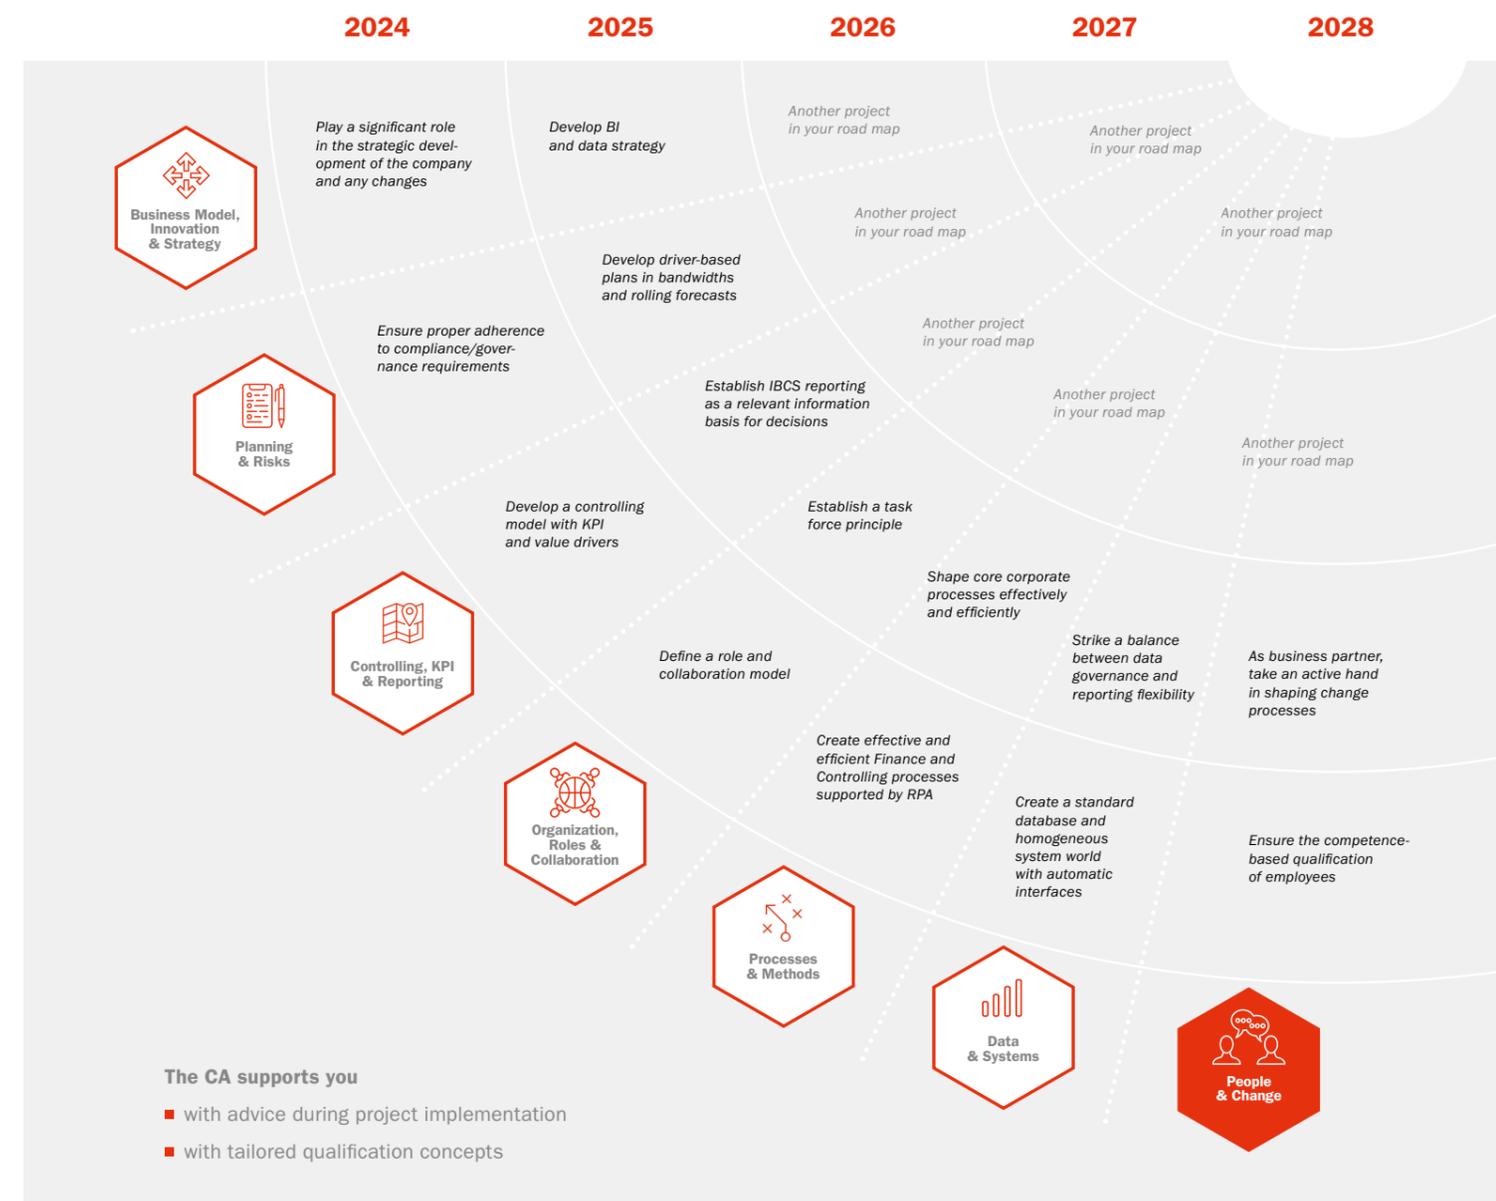

- What needs doing and where?**
 To derive the implementation strategy for your mission, we use the Finance & Controlling operating model, which consists of seven key areas. In a workshop, an analysis of each area is carried out and compared with the previously defined mission goals.
- What needs doing and how?**
 Priority is placed on the analysis findings and translating them into a roadmap with specific measures.

3 CFO/Controlling Roadmap

- How to prioritize?**
 We develop a roadmap based on the measures drafted in the workshop for the individual areas. The roadmap puts the various activities into an effective order while taking account of interdependencies and ongoing projects.
- What people, what resources to deploy?**
 You will only achieve your roadmap goals if you win over people for this transformation. To do this, you have to analyze financial resources, available employee capacities and the team's willingness to embrace change and, based on competence deficits, define your qualification needs.

This is what the roadmap for a medium-size company co-drafted with us might look like. It is purely an example and intended to give you a better idea.

The CA supports you

- with advice during project implementation
- with tailored qualification concepts

We tackle matters as they stand in your company, develop an individual CFO/Controlling agenda with you and help you to plan your roadmap.

To ensure successful effective implementation, we support you with the targeted qualification of employees and also advise you on how to implement individual projects.

Sounds interesting? Take advantage of our offer to take part in a free orientation workshop. (see previous page)

Jens Ropers, Partner
 +49 (0)170 - 742 06 73
 j.ropers@ca-akademie.de

“Focussing on our specific requirements, in just two days with the CA we were able to put together the basic structure for professional cost accounting, including the calculation of daily rates and gross margin analyses. We already plan to continue the cooperation. Thanks a lot.”

*Nora Makosch
Sr. Manager FP&A, Factworks GmbH*

Achieve goals in a focused manner.

Use our consulting services to develop your topics effectively and implement them successfully.

“We were particularly impressed by the comprehensive support approach – from employee training and practical implementation in the company to plotting next steps.”

*Michael Egerer
Head of Logistics/SCM,
Member of the Executive Board,
tegut... gute Lebensmittel
GmbH & Co. KG*

What makes CA Consulting so special? We see ourselves as a consulting manufactory that takes a holistic approach to issues. We do not impose ready-made concepts on you, but develop them together with you and your teams from the inside out. We look at your initial situation and objectives and also take into account your employees, their required skills and your corporate culture. Together, we design tailor-made solutions in which we support you both professionally and methodically in order to maximize your company's potential. Having held thousands of seminars, we are very familiar with the business practices of our clients from all sectors and of all sizes. That is why we know where the problem lies and can incorporate this invaluable knowledge into the conception and practical implementation of every consulting project.

However, a project is only as good as its final implementation. To ensure that everyone involved is motivated and committed right from the start, we act as moderators across all departments in order to anchor the set goals throughout the company in the long term.

With CA Consulting, we help you to help yourself, support you and your organization in the conception and further development of your internal processes and projects and accompany you through to successful implementation.

How can we support you? Regardless of whether it is a workshop, a small project or a large transnational group project. Contact us without obligation. We look forward to your project.

Nine good reasons why CA Consulting is the right partner to implement your projects.

1 | In-depth expertise

We are the experts for corporate management and controlling. With an objective view and eye for the big picture, we provide new ideas and stimulus for your company.

2 | Experienced in all sectors

We have a wealth of experience across all sectors in implementing countless projects from start-ups to blue-chip corporations and put together a team of experts based on your requirements.

3 | Tailored solutions

One-fits-all solutions rarely result in success in the long term. We therefore co-develop tailored solutions with you that take into account the specific nature of your company.

4 | Long-term success

We combine in-depth know-how with a keen eye for current and future developments to achieve future-focused results.

5 | Employee involvement

We integrate various levels of hierarchy and organizational areas into the project and thus ensure the necessary communication, interaction and acceptance.

6 | Fast and practical implementability

We pursue a hands-on approach, our concepts are designed to work in practice and not only in theory. We therefore support you in applying methods on the job so that you can quickly begin to make a difference with visible benefits for your company.

7 | Comprehensive support

We support you from project conception to conclusion, encompassing aspects such as the necessary change process and upskilling of your employees with professional qualifications to show for it.

8 | Cost under control

We do not expand or complicate projects unnecessarily, preferring to share our know-how and wean customers off any dependency on consultants.

9 | One face to the customer

Each project is supervised by one CA partner and an experienced project manager based locally. They remain your contacts throughout the entire duration of the project. In this way, we ensure trusting cooperation and stability.

We will be happy to advise you personally on specific challenges and issues.

Equipped for the new world of work.

Find out now what you will need for tomorrow.

We can feel change everywhere – be it at technological, economic or ecological level and it is revolutionizing our working world. It makes new demands of us all, because it increases the complexity of our future and its unpredictability, and also changes our roles in Finance and Controlling. However, this new working world also unlocks many opportunities for developing our careers and assuming new tasks in corporate management:

- Digitalization generates a growing body of data that we can put to profitable use in corporate management in order to create greater transparency.
 - New technologies enable rapid innovations and new business models that have to be managed differently to before.
 - Intelligent technologies automate standard processes and provide us with more time for tasks of greater complexity.
 - Planning and controlling are more agile and we can learn how to take complexity and dynamics in our stride.
 - The shortage of qualified labor offers many opportunities to acquire new skills and increase our own market value.
 - Growing regulatory requirements for ESG, transfer prices, etc. call for an ever-greater degree of specialized know-how and a holistic view of the effects.
 - Customer wishes and how to satisfy them are becoming increasingly specific and challenge Controlling as a customer-centric internal service provider.
 - Combining in person and online we can cooperate much more efficiently and effectively as the situation demands.
 - Changed values and sustainability can rival profitability in importance.
- Get started and expand your skills now. We will be happy to assist you.

- ... to learn what suits me
- ... more salary
- ... to better connect the dots
- ... to prepare myself for future challenges
- ... to enjoy my job more
- ... understand new technologies
- ... a good work-life balance
- ... to be more efficient

For me

I want ...

So that knowledge makes a difference!

In a VUCA* world characterized by change

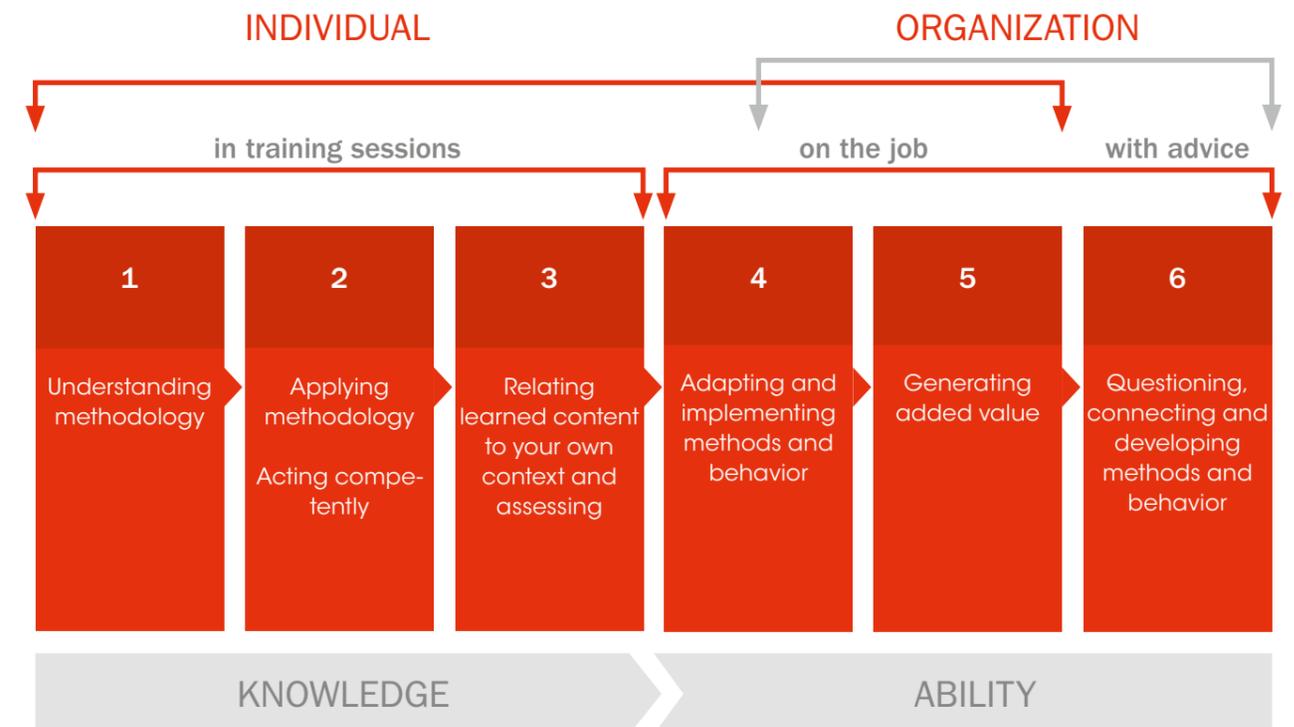

- lifelong learning is essential for everyone.
- organizations need to develop and reinvent themselves continuously.

The two should go hand in hand.

Because organizations tend to develop successfully when the people within them engage in continuous learning.

And people who want to develop their skills to keep pace with the future will prefer to stay with an organization that is committed to development and in which they can realize their abilities.

* Volatility, Uncertainty, Complexity and Ambiguity

Our sustainable knowledge-to-ability concept effectively supports people and organizations on this journey

- 1** | In the first learning step participants get to grips with **methodology**. We provide a comprehensive overview and prioritize methods important for your organization, explain why and how they are important.
- 2** | In the second learning step we **practise methods and behavioral skills** by means of role plays. Participants practise in groups with simplified real-life case studies.
- 3** | In the next learning step, you tackle **your own corporate reality**. We generate diversity by sharing experiences across industries. We allocate time and space for transfer exercises and (self-)reflection blocks.
- 4** | After training, you **compare what you have learned with the status quo in your own organization** and the people (superior or colleagues) who did not take part in the training. Now it is up to you to develop your competence and impart to others what insights you have gained in order to generate added value for your organization through what you have learned. The CA controller akademie supports your efforts to do so with follow-ups and one-to-one business coaching.
- 5** | **Genuine added value is generated for your organization when a change takes place thanks to your agency.** To do so, you adapt the methods you have learned to fit your company. During individual coaching, we support you with this step and help you to continue developing your abilities in the long term.
- 6** | In a dynamic environment, long-term success hinges on **continuous questioning of the status quo, adaptation and connecting methods and behavioral approaches**. We support your organization with consulting services and inhouse workshops. Individual coaching and an opportunity to share experiences in our communities is also offered. We see ourselves as a companion on your journey of continuous development from theory to practice.

New learning. Flexible and manifold. With fun!

The possibilities for expanding competencies are limitless.

The CA controller akademie offers you public and inhouse trainings as well as subsequent implementation support.

Trainings	Training programs with certificate	
Workshops	Live online trainings	Implementation support
Video trainings	Live online workshops	Coaching
Lectures / Keynotes	E-learning	

Various training formats in (live) online or on-site are available. You can combine all formats individually and choose exactly the format that suits your topic or learning style best.

On-site

- Personal face to face with trainer/coach
- Questions of the participants will be answered individually
- Participants can bring in their own practical experience
- Practice in role plays
- Participants work on case studies
- Reflection on methods and behavior
- Cross-industry exchange of experience
- Networking and get-together
- Helping participants to apply what they have learned to their own context

Live Online

- Live online face to face with trainer/coach.
- Questions will be answered during the lecture
- Participants can bring in their own practical experiences
- Exercises with role plays
- Participants work on case studies
- Exchange of experience across different industries in a virtual room
- Assistance to apply the knowledge in the own context
- Practical and descriptive teaching

1:1 consulting & individual coaching

- On-site and live online
- We ensure an intensive exchange
- Intensive implementation support
- In individual sessions, we also deal with very personal concerns using the methods of systemic coaching

Controllers Training Program in five stages

Step by step to Controlling Excellence.

Secure yourself with all the relevant hard and soft skills the crucial advance in knowledge for best performance in the controlling of the future.

»CA Diploma Program delivers a comprehensive education incl. soft skills for an interdisciplinary job and offers opportunity for exchanging with controllers from different countries, companies and industries. Therefore we are thrilled to send our colleagues to this program.«

Milovan Arnaut, Venturing Finance, Henkel AG & Co. KGaA

Target groups:

- Managers and employees in controlling, management accounting, financial accounting as well as in cost accounting, corporate planning, management information systems, business administration and development
- Managers from sales, marketing, production etc.

Future-oriented concept

Controllers Training Program in five stages has been rigorously adapted over 50 years to reflect the latest developments in controlling. Here you will become fit as a controller and business partner. You will prepare yourself optimally for the coming challenges of digitization and globalization. Numerous graduates of Controllers Training Program have subsequently successfully shaped and further developed controlling in their companies with their newly acquired competencies.

You expand your scope for action

In order to create transparency in a company controllers need three skills: entrepreneurial understanding, know-how on data processing and analysis, and psychological intuition. Even the best instruments, tools, results, reports and charts are only as good as the reasoning and presentation skills of the controller. Our seminars meet this requirement in terms of content and didactics.

You receive implementation competence

In order for you to be able to apply your new knowledge, we put a special focus on the implementation in your practice. Therefore, we have included numerous transfer and feedback units during the seminar. In addition, we are happy to accompany you individually in 1:1 business coaching during the subsequent implementation.

What awaits you

Stage I conveys an overview of the most important components of the modern controlling in both its connections and practical implementation.

Stages II and III extend, supplement and deepen the controller's toolbox. Stage III additionally teaches the essentials about communication and leadership skills.

The workshop stages IV and V focus on the application and implementation of the tools developed. The training of presentation and moderation skills is intensified.

Training Formats

The English training is designed as an intensive and lively exchange of experiences both during and after the seminar. It takes place from Monday until Friday.

Training courses format

We are offering you two training formats for the stages: the classroom seminar and the live online training. Both formats convey the same content and focus on practical application with exercises and the interaction between the trainer and the seminar participants. You can combine classroom seminars and live online training courses as required.

Degrees

Controllers Certificate CA

Obtaining the Controllers Certificate CA, which requires that you complete stages I, II and IV of the Controllers Training Program in five stages, demonstrates you have attained proven, certified controlling skills. It is intended for participants who are seeking a more streamlined path through the stages program

and want to concentrate initially on methodological and functional topics.

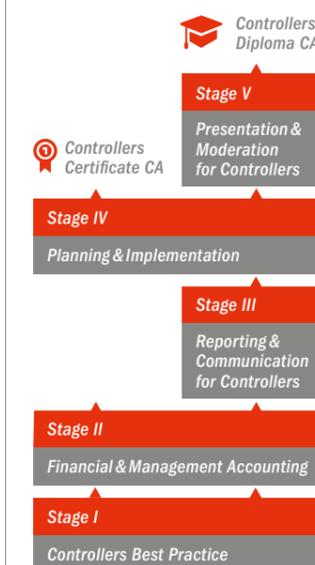

Controllers Diploma CA

Controllers Diploma CA certifies your controlling excellence in the role as business partner of management. By successfully completing the Controllers Training Program in five stages your work in actual controlling practice will demonstrate proven communication skills and functional expertise. A self-examination is conducted at the end of stage V when participants make presentations that are evaluated by the trainer and the seminar participants.

IGC-QUALITY LABEL
"CA controller akademie has demonstrated in exquisite detail and in an understandable manner its high level of professionalism, its wealth of experience and its striking continuity."

Step by step to Controlling Excellence

Stage I

Controllers Best Practice

»The trainer was illustrating every topic very clear, ensuring that each participant would understand. The workshops helped us to implement learnings while real life experiences from the trainer helped us to visualize alternative cases in work environment.«

Nihan Yildirim, Mayr Melnhof Packaging Süperpak,
about Controllers Training Program in five stages, Stage I

Everything you need to know for more effective accounting, financial reporting and corporate planning.

Market, competitive and stakeholder situations are changing at an ever-increasing pace, calling for agile yet targeted management control. So setting up a controlling system that addresses modern requirements is essential. In-depth practical experience of key controlling tools, new approaches and methods are another important prerequisite.

At the same time, controlling and the role and skills demanded of controllers are changing in the wake of digitization. Stage I communicates hard and soft skills to successfully perform the role of business partner and shape controlling processes effectively and efficiently. In addition, new roles in controlling, such as the Data Scientist, will also be discussed.

Seminar Content

- I. **Controlling for Successful Corporate Management**
 - Controlling as management process of defining goals, planning and management control
 - Objectives and Key Results (OKR)
 - Controller as business partner – understanding of roles and necessary competences
 - With contribution margin accounting to the right decision
 - Break even chart, price volume changes, variance analysis and cost structure
 - Future-oriented controlling – successfully leading of variance analysis meetings and deriving action
- II. **Important Connections between Management Accounting and Financial Accounting**
 - Details of profit- and loss account, balance sheet and cash flow statement
 - Cost summary and cost of sales method
 - P&L: cost of sales and cost summary method
 - Holistic thinking and acting in controlling
 - The ROI-tree for sensitivity analysis and simulation
 - Deriving of profit target over the capital costs
 - Case study on planning/budgeting
- III. **Planning, Budgeting, Variance Analysis and Forecast**
 - Integration of strategic and operational planning
 - Modern budgeting and rolling forecast
 - Application of strategic instruments (SWOT, five forces, product portfolio, potential profile, strategic form, business model canvas)
 - Computer based sales forecast with regression analysis (predictive analytics)
 - Cost center planning and variance analysis
- IV. **Development and Building Blocks of the Controlling System**
 - Connections of contribution margin accounting, product costing and cost center accounting
 - Calculation and sales price determination on the basis of various practical examples
 - Case study on strategic planning
- V. **Trends and Developments in Controlling**
 - Digitization – business model, products, processes and data
 - Future development for controllers (New roles for the controlling function)

Your benefits

- Deepen your knowledge on the most important controlling tools
- How to support digital transformation as a controller
- Train methods and instruments in case studies
- Increase competences in communication and moderation

»Very well organized seminars with case studies to specific business cases and actual topics.«

Claudio Rossi, Rubner Holding AG – S.p.A.,
about Controllers Training Program in five stages, Stage II

Stage II

Financial & Management Accounting

Here you can expand your detailed knowledge of controlling methods.

The increasing influence of accounting and transfer prices on figures and performance measurement shows that accounting knowledge is indispensable in controlling. Holistic corporate management requires linking profitability and financial transparency and controllers must be able to present the planned budget, including investments, in terms of their effect on the income statement, balance sheet, cash flow and financial ratios. That's why we begin with integrated profit and financial planning in Stage II. You will look at the entire investment evaluation, learn about the potential offered by modern IT tools and the impact of internal cost allocation and transfer pricing on key figures.

Seminar Content

- I. **Principles of Financial Accounting**
 - What do the balance sheet and cash flow statement provide? Differences between the Contribution Accounting and P&L (according to cost summary and cost of sales method)
 - Cash flow statement based on IAS 7 or DRS 21
 - Procedure for constructing the budgeted balance sheet and the budgeted cash flow statement
- II. **Case Study for Medium Term Financial Planning**
 - Plausibility checks for a business plan as part of the financial diagnosis: Key ratios on liquidity, stability and profitability as a “quick check”
 - Financial management and working capital in combination
- III. **Value Based Controlling**
 - Calculation of the weighted average cost of capital WACC
 - Criteria for investment evaluations: payback period, Net Present Value NPV and investment portfolio; potential weaknesses of the Internal Rate of Return IRR
 - Introduction to business valuation: Shareholder Value (Discounted Cash Flow), Economic Value Added™, multiples, Due Diligence
- IV. **Controlling of Structure Costs / Fixed Costs**
 - Plan and manage costs applying Zero Base Budgeting ZBB
 - Introduce and use Activity Based Costing ABC with limited effort
 - Process Mining: IT-based analysis & visualization of processes improve compliance, process stability and costs
 - Robotic Process Automation (RPA) – a central component of digital transformation
- V. **Fundamentals of Sales and Customer Controlling**
 - Overview: integration of strategic and operational sales controlling tools
 - Big Data in sales and marketing: influence of Predictive Analytics and Dynamic Pricing
 - Key figures for sales in a “digital world”
 - Target Costing – “strategic calculation” and management of customer value
 - Workshop: profit center accounting and segment reporting (IFRS 8 compliant), customer result account, sales deductions, incentive model for the sales force, dashboard for the sales manager
- VI. **Transfer Pricing**
 - Conflicts of interest: managing performance versus tax optimization
 - Where and how transfer pricing influences controller's key figures
 - Internal charging: an instrument to optimize the use of internal resources

Your benefits

- **Expand your skills portfolio to include controlling of strategy, profitability and finance**
- **Deepen your skills in management and financial accounting**
- **You get familiar with modern IT-based opportunities for targeted management of structure costs and sales activities**

»Seminar content was great and provided new ideas which are relevant to my work. All topics were well explained. I was very pleased to have such a seminar available also online, easy to attend, using modern IT applications.«

Petra Stepankova, HE Space Operations BV,
about Controllers Training Program in five stages, Stage III

Stage III

Reporting & Communication for Controllers

Train how to communicate in the management process in order to achieve successful corporate management.

Industry 4.0/ Internet of Things and the digitization that it involves bring significant changes for all companies. These changes relate not only to the conception and development of meaningful reporting towards creating a digital boardroom, but also the standardization of processes and the development of relevant, dynamic key figures that take into account social media, among other things. Agile project management and controlling will increasingly be a part of everyday corporate life. The growing importance of the controller's role as a business partner and change agent in volatile times must be reflected in an equally high level of professionalism in social competence.

Seminar Content

- I. Project Controlling**
 - Success criteria for projects
 - Phases and key tasks of projects
 - Integration of project and corporate planning
 - Project reporting
 - SCRUM – agile project management
- II. Success Factor Reporting**
 - BI and Big Data – from strategy to realization
 - Predictive and Advanced Analytics – new tool set for Controllers
 - Receiver oriented business charts and tables
 - Excel hints for implementation
 - With SUCCESS to the International Business Communication Standards (IBCS®)
 - Integrated Reporting
- III. Development of Key Performance Indicators**
 - Integration of a (e.g. digital) strategy into the operational business
 - Developing strategic key figures using the balanced scorecard approach
 - Developing sustainability strategies and ESG reporting
 - Exercise on the development of sustainability indicators (SDG and ESG)
 - Visualizing, optimizing and standardizing of processes
 - Developing process-relevant indicators
- IV. Controller as Business Partner and Change Agent**
 - MOVE and change management
 - Cooperation and managing relationship
 - The „Co“-functions in Controlling
 - Fundamental communication models
 - Patterns and improvement of team work
 - Factors influencing the leadership situation and the role of managers
 - Principles of how to secure the transfer of know-how

Your benefits

- **You master the relevant controlling tools for standardizing and boosting process efficiency – basic requirement for their automation**
- **You reduce the complexity of your business charts and tables in reports and thus increase their appeal**
- **You know the psychological foundations of successful communication and informal business partnering**

»Very good organization of the hybrid variant. Although we were not physically present it was like we were there. I haven't felt any disadvantage.«

Mihaela Vida, Woco Pipe System Components Rom SRL,
about Controllers Training Program in five stages, Stage IV

Stage IV Planning & Implementation

Train in a team how to implement all important controlling- and management methods in practice.

The controlling scene is characterized by a variety of revolutions. New challenges with the emergence of digitization, a changed role model in the sense of business partnering and modern organizational structures such as shared service centers are only three offers from a hardly manageable shopping cart of partly overlapping and contradictory controlling developments. Software-Tools, methods have to be implemented and skills adapted. It is important to overcome the hurdles between necessities and practice in day-to-day work.

Workshop Content

- I. **Update of a Management Accounting System as Preparation for Planning**
 - Analysis and design of both production and administration cost centers (including activity-based costing)
 - Requirements and methodologies of a state-of-the-art product costing
 - Elements and structure of a decision- and responsibility-oriented management result account; harmonization of the income statement (internal/ external)
- II. **Development of an Integrated Planning Concept**
 - Core elements of a business plan
 - Inclusion of external requirements such as Business Judgement Rule, risk management, bank rating as per Basel II/III
 - Connecting strategic and operational planning
 - Design of a planning conference (PowerPoint- or Excel-based)
 - Examples of use for predictive analytics and Monte-Carlo-Simulation
- III. **Financial Controlling Part 1**
 - Structure of a planned income statement, planned Balance Sheet and planned Statement of Cash Flows to manage structural and free Cash Flow
 - Financial analysis using key figures
 - Planning and managing working capital using the Cash-to-Cash-Cycle (DSO, DPO, DIO)
- IV. **Financial Controlling Part 2**
 - Hedging of financial risks (e.g. currencies, raw materials, interest rates) with the help of financial derivatives: (options, swaps and futures)
 - Corporate financing (gearing, leverage, cost of capital)
 - Current highlights and lowlights of IFRS accounting using practical examples
- V. **Workshop on Current Trends in Controller Practice**
 - Inventory of controlling relevant topics and prioritization
 - Problem solving in a team, presentations and discussions
 - Example topics: outsourcing/ starting a shared service center, Controlling and Sustainability („ESG“), E-Commerce-Controlling, opportunities and risks of digitization for controllers or other topics introduced by participants
- VI. **Controlling the Controller's Work**
 - Transparency in the controller's service
 - Performance measurement and management for controllers
 - Balanced Scorecard for the controller's service

Your benefits

- **In the workshop Stage IV – Planning & Implementation, you will learn how to use the controlling tools developed in stages I to III for a case study company (real case with two divisions)**
- **During the training you will be brought up to date on the latest developments in controlling and you will be able to work on your own topics from your controller practice with colleagues**
- **A “self-controlling” in the sense of a continuous improvement process (CIP) of the controller service rounds off the workshop**

»The way of training and the particular presentation method of the CA trainers enhanced my controlling abilities.«

Jan Šulc, Continental Teves s.r.o.,
about Controllers Training Program in five stages, Stage V

Stage V Presentation & Moderation for Controllers

Improve your communication skills and enhance your perceptiveness in groups.

Ongoing changes in company organization increase the demand for the controller to act as business partner. In the interaction with managers, controllers need to recognize, visualize, present but also discuss economic interrelations, more than ever. In addition to the holistic economic understanding, knowledge on communication in groups, processing information for faster comprehension is needed, as well as the ability to facilitate developing discussions in a target-oriented way. Corresponding behavioral training is a firm component for up-to-date controller education. In this training, you will learn the techniques and success factors to solve complex problems, develop the most important rules of presentations and optimize your communication skills. You will also intensively practice the role of business partner – using feedback, video analyses and implementation aids regarding demeanour, language and behavior. Finally, you will hold a diploma-worthy presentation and moderate a meeting before the plenary session of participants.

Workshop Content

- I. **Method Training**
 - Strategic analysis and strategic program
 - Applying the strategic planning method Canvas
 - Visualization, presentation and moderation techniques
 - Applying question techniques in a targeted manner, especially when moderating
 - Protocol techniques for “problem solving as a team”
- II. **Personal Skills**
 - Promoting and interfering behavioral patterns in teams and plenary sessions
 - Moderation of teams and plenaries
 - Presentation work in front of plenary
 - Recommendations on behavior in these situations
 - Video analysis
- III. **Solving Problems in Teams**
 - Team analysis: phases of team work
 - Team composition and team efficiency
 - Observing and giving feedback on behavior
 - Structuring work processes
 - Visualizing results
- IV. **Ensuring Transfer**
 - Reflection of own actions and effects
 - As participants: What, how and when do I want to implement change?
 - Success factors for implementation

Your benefits

- Using video evaluations, you will develop and apply the most important rules for presentations
- Optimize your communication skills as a controller and business partner
- You put to the test intensively actual issues from controlling practice
- You will receive personal feedback and implementation assistance from both the CA trainers and your fellow participants

Date
14 – 18 October, Munich

CMA® Certification for Professionals in cooperation with IMA®

You have all the tools and support needed to confidently conquer the CMA® exam.

NEW
CONCEPT

»I've received my test results for part 1 of the exam in June (I passed!) and wanted to say thank you. I truly hope David and the CA helped my fellow participants the same way and will also in future.«

Benjamin Gillgasch

Target group:

Financial Professionals with an education and/or experience in finance and controlling

Designed for people who want to advance their professional accounting and finance skills.

Certification for Accountants and Financial Professionals

The CMA® (Certified Management Accountant) is the advanced professional certification specifically designed to measure the accounting and financial management skills that drive business performance in globally active organizations. The CMA® is a tailor-made certification program for finance professionals at all levels in order to enhance their value to a current organization or to expand their career potential. The CMA® program allows for participants to proceed with self-study at their own pace. It is designed to be time-efficient and cost-effective.

IMA's Certification for
Accountants and
Financial Professionals
in Business

CMA® with CA controller akademie

Unlock your path to success with CA controller akademie's exclusive CMA® all-inclusive package, especially crafted to empower aspiring professionals like you to excel in the field of international management accounting. Our comprehensive offering combines a complete CMA® Self Study Package and extensive video training with live online instructor-led tutorials, ensuring you have all the tools and support needed to confidently conquer the CMA® exam.

Tutorial Profile

Use up to three times the opportunity to take part in our two-hour live online tutorials with David Fairchild. David Fairchild, our instructor, is himself a CMA® and CPA® and writes test questions for the CMA® exam. Participants highly profit from his experience and excellent hints of how to take the exam.

During the two hours of each tutorial, David will answer your questions, give you helpful tips on passing the exam and will prepare an essay exam for either Part 1 or Part 2 (your choice). The exam questions can be practiced very well in the online test database you have access to. Essay writing is more difficult. The essay is assessed qualitatively by professors (to a small extent also in relation to English skills). Therefore, we offer this essay exam preparation for Part 1 and Part 2 in our tutorials. You will subsequently receive a proforma grading for your essay with individual written feedback (also in relation to your English level) within a couple of days after the tutorial.

CMA® All Inclusive Package

- IMA application and CMA® entrance fees
- 1 year IMA membership
- 2 exam fees for part 1 and 2
- 3 years unlimited access to BECKER CMA® Review Advantage Package for part 1 and 2
- 2+1 practice-oriented Live Online Tutorials (Part 1 & 2 plus one repetition) with a duration of 2 hours each covering Q&A sessions, tips for taking the exam and practice essay questions (both parts) with proforma grading and individual feedback for every candidate

CMA® All Inclusive Package
Exclusively available for EUR 2,990,-

Inhouse Certified Change Agent Program

Build a network of effective change agents while implementing planned change projects.

NEW

» Pioneering this program in collaboration with CA controller akademie has been a great success. Within one and a half years a total of 54 participants from different business functions have completed the program. The business entities request additional program runs and we are there to support them. «

Zlatka Radeva, Head of Finance/HR Academies, METRO AG

For companies that want to

- organize and carry out their transformation successfully
- inject new energy into progressing change projects
- build up a competent change team

Organizations need organized change expertise

Transformation is determined by technological, social, economical and ecological transformative movements and is reforming our entire working world. Megatrends such as connectivity, globalization, neo-ecology or gender shift affect all organizations and make major changes necessary. Yet the initiative to launch and successfully shape these changes often comes from a minority and not uncommonly from the top management. A lot of work needs to be devoted to convincing, mobilizing and motivating the majority of people to embrace the radical changes ahead. The efforts of top management or individuals alone are not enough. Many committed stakeholders with change expertise and available resources are required for this.

Companies must be bold and take a big step into the future. This means that alongside the core system that reliably takes care of everyday operations, another system must be built up to develop and successfully implement strategic change initiatives. This additional system consists of people who as "influential change agents" within the company consistently promote change with determination and ensure that a growing number of people rethink their attitude positively and themselves commit to shaping change processes with their creative input.

CA Certified Change Agent Training Program

Selected persons from your company take part in a program lasting around six months to become CA Certified Change Agents, while at the same time working on the company's change projects. In an ongoing process, participants put their new knowledge into practice in their change projects. In the process, they gain experience, consolidate their know-how and pass it on to others. In addition, the prospective change agents benefit from two one-to-one personality development coaching sessions. Throughout the program, participants are supported by a change expert schooled in psychology who also liaises closely with the company's inhouse program coordinator.

- During certification, participants
- gain a basic understanding of change leadership with all key models and tools.
 - understand psychological reactions to changes and can deal with them appropriately.
 - know how to foster commitment to change and turn resistance into positive energy.
 - can create an inspirational vision of change, communicate it convincingly and apply various techniques to effectively progress changes.
 - apply what they have learned to their change projects already during their training.

The Certified Change Agent program is taught in German and English

NOMINATION	KICK-OFF	MODULE 1	PRACTICE 1	MODULE 2	PRACTICE 2	PRACTICE 3
Support on selecting and nominating suitable candidates for the Certified Change Agent Program	Kick-off event First get-together event with the change agents and representatives of the top management — two hours live online	Change Leadership Understanding, mobilizing and empowering people — two-day in-person session	Enlarging on the methods from module 1 Stakeholder analyses and change architecture Part 1 Transformation scaling Promoting project synergies — Development of change ambassadors — One day live online	Influence, conflicts, moderation Learning influencing techniques — Extending personal conflict style — Effective group moderation — Two-day in-person session	Peer-based advice as key development method Processing specific cases in projects — One day live online	Presentations of change interventions Part 2 Transformation scaling Acting effectively as a change team — Internal corporate communication — One day live online
Implementation of transformation projects using the methods learned (change intervention)						
PERSONAL COACHING — two one-hour sessions per participant						
CHANGE CAMP ATTENDANCE — out-of-the-box experience sharing						
GRADUATION Presentation of the change project — Two hours live online						

Additional skills expansion to promote personal development

All participants in the inhouse change agent program possess different skill sets and during their change activities will constantly be tested to their personal limits. We therefore recommend all certification program participants to attend one to two seminars to expand their personal skill sets depending on their tasks and work focus. For details, please refer to the change agent training program website.

Benefits

- Develop change expertise while at the same time effectively push ahead with your company's transformation

Inhouse Training

We train, advise and coach you on your premises in all areas of our five focus subjects.

Controlling

Accounting & Finance

Business Development

Information Management

Social Skills

Target audiences

- Corporations, as well as small and medium-sized enterprises across all sectors
- Institutions and non-profit organizations
- Controllers and non-financial professionals
- Managers, specialists and executives
- Individuals and teams

We train your employees with your company's interests at heart

Transformation, agility, digitization, continuous development. Irrespective of how companies prioritize activities internally, to remain competitive, upskilling their organization and employees is a necessary prerequisite for such processes. This requires a strategy to focus on additional know-how, new or adapted methods, competences and usually also fresh motivation to achieve the goals envisioned.

Benefits of inhouse activities

Think globally, manage locally

The vision of many C-levels consists of creating a common company-wide understanding of corporate management. This includes tasks, functions, methods, processes and competences. Uncertainties and inaccuracies are reduced in the process, the need for coordination is minimized and efficiency hiked. In addition, a common awareness of pending challenges is created and solution approaches can be devised for all sites across the company.

Acceleration of transformation processes

Organizations can upskill quickly by means of an effective, well-designed and coordinated training approach. Our training experts with their wide experience of the corporate world can help you to place learning content into your particular business context. Valuable group experiences are also engendered.

Securing theory-to-practice transfer

Our post-seminar follow-up sessions facilitate the transfer of theory into practice. We discuss your initial experiences, explore problems and thus inspire a greater degree of confidence and competence.

Managing by numbers

Not everyone shouldering a managerial position has a business studies or MBA background. In the majority of cases, the qualifications of managers stem from completely different disciplines. Our special training programs for managers and non-financials provide effective support in building up competence in the business and economic aspects of corporate management.

Integration into personnel development concepts

The content and methods of our courses can of course also be integrated into your existing personnel development concepts and programs as part of your inhouse training center curriculum or courses.

Training

In our inhouse training courses we impart current content from our five focus subjects and help you to successfully implement them in your daily business routine. All the subjects in our product portfolio can be booked in an inhouse training format. We will also be happy to compile training content with you that is tailored to your specific needs.

Workshops

In workshops we see our role as moderators and business coaches who help participants to devise and implement solutions, such as developing and implementing strategy, preparing kick-off meetings for transformation processes, reviewing and/or developing new planning processes, cost accounting systems and many other subjects.

Business coaching

Learning by doing. We prioritize personal initiative so that you can achieve your goals with as little outside assistance as possible. In our coaching projects we effectively support individuals in building competence, to equip them for a new upcoming role or as a professional sparring partner to take a critical look at their (almost) finalized concepts and to suggest possible improvements.

Lectures and keynote talks

We supply fresh stimulus with fascinating interactive keynote talks on various subjects and raise awareness of trends and current market developments among your employees.

Trainers & Consultants

Trainers and Consultants of CA AKADEMIE AG

These trainers, consultants and coaches of the core team of CA have broad inhouse experience in all industries that is permanently incorporated into the learning content. In every seminar you benefit from topicality, practical relevance and a broad knowledge of the industry.

Dr. Thomas Biasi

has been a trainer and consultant at CA Akademie AG for over 20 years. With his passion for strategy, he inspires participants at in-house seminars, specialist conferences, in the CA iTalk and with motivational speeches and keynotes.

In addition to the topic of strategy, he supports our customers in national and international projects in the areas of business model development, reporting, social skills and operational controlling. He also works on numerous training and consulting projects for managers and non-controllers.

Dipl.-Ing. Dr. Klaus Eiselmayer

has been a trainer since 1995, a partner since 1997 and a member of the Management Board of CA Akademie AG since 2012. He is a board member of the International Group of Controlling and a board member of the International

Controller Association. He specializes in business planning, internal and external accounting, value management as well as presentation, moderation and team design in German and English. From 2007 to 2013, he was a board member of the Verlag für ControllingWissen publishing house and editor of the Controller Magazin.

Dipl.-Oec. Guido Kleinhietpaß

has been a trainer and partner of CA Akademie AG since 2002. He specializes in cost accounting, integrated business planning (scenarios, driver-based planning, investments, balance sheet, P&L, CF statement, risk), accounting and transfer pricing as well as communication controlling.

As a consultant, he primarily supports companies in the realignment of cost accounting and planning. He is the author of various specialist books.

Dipl.-Ing. Dietmar Pascher

is a partner at CA Akademie AG, keynote speaker, trainer for controllers, non-controllers and managers. He is responsible for CA International and online training. As a consultant, he supports companies in the implementation of projects in English, Spanish and French. He is also an IBCS®

trainer for reporting and an expert in presentations. He also specializes in project and sales controlling, communication, leadership and business partnering.

David Fairchild

conducts as a Certified Public Accountant (CPA) and Certified Management Accountant (CMA) the live online tutorials for the CMA All-Inclusive-Package of the CA controller akademie. He has extensive professional experience in multiple areas of corporate finance and accounting

for US multinational corporations with operations in Germany, Austria and the Russian Federation. Membership in the Institute of Management Accountants (IMA).

Dipl.-Kfm. David Nerz

is a Senior Consultant at CA Akademie AG and works as a trainer and consultant. His consulting focus is on cost and performance accounting, planning, reporting, optimization of BI tools, transfer pricing and contribution margin accounting.

Before joining CA, he worked for several years as a controller in Germany and abroad.

Dipl.-Kfm. Danny Szajnowicz

is a partner at CA Akademie AG and is responsible for the CA Consulting division. He provides methodical and technical support to companies in a wide range of industries in the implementation of projects and the moderation of workshops. He has extensive experience in the

implementation and management of projects in the areas of strategy development, corporate management/controlling, organizational development and process optimization (lean management). He also conducts numerous seminars for controllers, specialists and managers in German and English.

Dipl.-Psych. Claudia Weyrauther

is the founder and shareholder of lumanaa GmbH & Co. KG. As a trainer, consultant and coach, she has extensive expertise in the implementation of transformation projects. Her goal is to create a new awareness and understanding of the psychological, systemic and

cultural connections in teams and organizations, and to expand their personal development and change capacity as well as that of their teams and organizations with the help of new attitudes and skills.

Dipl.-Bw. (FH) Markus Wolff, MBA

has been holding seminars as a reporting specialist in the areas of Management Information Design and BI at the CA controller akademie for many years. He is managing director of chartisan

GmbH, a specialized consulting and implementation partner in the field of controlling and reporting. The focus of his activities is on report automation and data visualization, based on the IBCS concept (HICHERT-SUCCESS). As a trainer and consultant, he has specialized in these topics for more than ten years. Previously, he studied business administration at the University of Applied Sciences in Eberswalde and at the Danube University Krems and worked as a corporate controller.

Dipl.-Kfm. Prof. Detlev R. Zillmer

has been a trainer since 1992 and a partner at CA Akademie AG since 1994. He expanded his skills in psychology and communication, among others with P. Watzlawick and R. Fish at the MRI in Palo Alto. He trained as a coach for individuals and teams at ISB in Wiesloch.

He is responsible for social skills, organizes the Change Camp, accompanies teams and individuals in change processes and helps companies with strategy and organizational change projects.

Valentin Usenkov

based in Dubai (UAE) is founder of USENKOV.PRO and its five-modules, 15-days consulting workshop for company owners and top-managers „Controlling for the Key Persons“ with over 1000 participants from Russia, Germany, Italy, Croatia, Poland, Kazakhstan, Kyrgyzstan

and Belarus since 2010. He is an author and facilitator of the consulting workshops and strategic sessions for top managers in the field of strategic and operational controlling, business economics and managerial finance and provides controlling training to controllers and CFOs in Russian and English language. He acted as an architect and methodologist in more than 20 projects of management accounting implementation in companies and holdings. Since 2017 Valentin Usenkov is license partner of CA Akademie AG, certified trainer of its “CA Controllers Trainings Program in Five Stages” and an active member of the international working group at ICV International Association of Controllers. Valentin has an Executive MBA degree.
