

IMA's Certification for
Accountants and
Financial Professionals
in Business

CMA® Certification for Professionals in cooperation with IMA®

The CMA® (Certified Management Accountant) is the advanced professional certification specifically designed to measure the accounting and financial management skills that drive business performance in globally active organizations.

The CMA® is a tailor-made certification program for finance professionals at all levels in order to enhance their value to a current organization or to expand their career potential.

The CMA® program allows for participants to proceed with self-study at their own pace. It is designed to be time-efficient and cost-effective.

CMA® with CA controller akademie

Our tutorial will guide the participants through an intensive review of the CMA® program's complete syllabus

Tutorial Profile

Each three days of the course will have a clearly defined structure and content covering subjects that are very likely to be new to the students.

We particularly focus on US-specific topics which are different to the European approach. In addition, the sessions will review the CMA® learning outcome statements to familiarize students to the contents of the CMA®.

The students will be asked to review these statements and to reflect their existing knowledge. This exposure will enable them to sit for the CMA® exam immediately or, if appropriate, target their further learning efforts more effectively.

CMA® 3-Day-Tutorials for Part 1 and 2

CA controller akademie offers a three day instructor-led tutorial for each part of the CMA® exams that are administrated through the worldwide network of Prometric Testing Centers.

Participants in the specially tailored CA controller akademie tutorials are expected to be well acquainted with the complete CMA® syllabus in order to be able to follow all the subjects and content covered in-depth during the tutorial.

He assists companies in putting strategic, operational and financial controlling topics into practice. He is IBCS® certified trainer for better reporting and expert for clear presentations and business partnering.

Who profits from the CMA® certification?

Financial professionals with an education and/or experience in finance and controlling who are working or plan to work in an international business environment. The CMA® today is basically a common prerequisite for controlling obligations in globally active companies outside of Europe. Obtaining this widely recognized global accounting certification for corporate finance professionals will enable you to deliver value in today's complex business environment.

The CMA® exam is designed specifically to validate mastery of the advanced skills required to manage finance functions within globally active organizations. By focusing only on advanced accounting and financial management skills, the exam is rigorous yet responsive to the needs of the marketplace and time-constrained professionals. Achieving the CMA® credential demonstrates competence of financial planning, analysis, control, and decision support.
