Who profits from the CMA® certification?

Financial professionals with an education and/or experience in finance and controlling who are working or plan to work in an international business environment. The CMA® today is basically a common prerequisite for controlling obligations in globally active companies outside of Europe. Obtaining this widely recognized global accounting certification for corporate finance professionals will enable you to deliver value in today's complex business environment.

The CMA® exam is designed specifically to validate mastery of the advanced skills required to manage finance functions within globally active organizations. By focusing only on advanced accounting and financial management skills, the exam is rigorous yet responsive to the needs of the marketplace and time-constrained professionals. Achieving the CMA® credential demonstrates competence of financial planning, analysis, control, and decision support.
